Ancero announces partnership with Layer 8 Security

Ancero, Communications Solution Provider brings comprehensive cybersecurity solutions to the SMB

Mount Laurel, N.J. (June 21, 2016) – Ancero LLC announced today its partnership with Layer 8 Security, a leader in the cybersecurity field. Recognizing that technology is only one part of the security equation, Ancero selected Layer 8 Security as their partner to complete the comprehensive solutions organizations truly need to protect themselves against threats.

With cyber attacks and security breaches occurring regularly, data protection has become an important area of concern for business owners who now understand the devastating impact it can have on their organization. Ancero selected to partner with Layer 8 Security to meet this growing need with robust, cost effective, security solutions for the SMB client.

“It became clear to us over the past year that our offerings needed additional capabilities to meet our customers’ cybersecurity needs & compliance requirements. After careful consideration we partnered with Layer 8 Security to broaden our range in this complex, specialized space,” commented Paul Boyer, Managing Partner with Ancero. “Our full service Managed IT suite combined with Layer 8 Security’s comprehensive security offerings provides the value and protection our customers are looking for.”

As a trusted technology partner for many organizations, Ancero carefully considered their choice for a security partner to introduce to their clients. The full service portfolio, depth of expertise, meticulous nature and exceptional reputation of the Layer 8 Security team solidified the decision. “The Layer 8 Security philosophy that ‘Cybersecurity is most effectively managed at the human layer where business processes and technology intersect’ truly resonated with us and the way we approach the integration of new technologies. Training and education is of the utmost importance,” Paul Boyer.

“We are confident that Layer 8 Security’s suite of services will further compliment Ancero’s superior technology solutions. In such a sophisticated and dynamic threat landscape we see tremendous value in this new relationship and look forward to engaging with the leaders of Ancero’s clients to educate and inform them about creating resiliency with this comprehensive approach.” said Jeff Lipson, Executive Director at Layer 8 Security.

Dedication to outstanding service and a shared commitment to excellence make for a perfect combination in Ancero and Layer 8 Security. Whether the client has already suffered an attack or is proactively taking measures to prevent one, they can confidently turn to Ancero and Layer 8 Security for help. The full range of services offered by Layer 8 includes: Information Risk Assessment, Internal and External Penetration Testing, Managed Phishing Campaign, Breach Response, Training and Education and War-gaming.

About Layer 8 Security

Layer 8 Security is a comprehensive cybersecurity services company. The staff received extensive experience and training from operations serving in the National Security Agency, U.S. Cyber Command, DoD, Special Operations, Defense and Private Industries. We served at home and abroad, and many of us still serve our country today in the military Reserve. Now we're bringing the best of breed practices to the commercial marketplace. Our team has decades of experience servicing complex, multifaceted IT Security needs in warfare, private industry and government.
