IaaS

Cloud Solutions. Above & Beyond

The Cloud is a Game Changer for Small Business

Is your small to midsize business facing a network hardware refresh or upgrade?
Don't buy, build, and maintain expensive IT assets when you can simply "plug in" to the cloud with the cost-effective 'pay only for what you use' Infrastructure as a Service (IaaS) cloud model. IaaS can be quickly scaled up or down according to current demand, allowing you to maximize operational efficiency. In most cases IaaS is half the cost of the traditional data center model.

Infrastructure as a service (IaaS) is an instant computing infrastructure, provisioned and managed over the internet. Azure provides the infrastructure, while your Cloud Solution Provider designs, configures, and manages your cloud solution, based on the requirement.

Microsoft Azure

Microsoft Azure Cloud Platform

Ancero's cloud solutions are powered by the Microsoft Azure Cloud platform and as a certified Microsoft Cloud Solution Provider we ensure you will have a flexible, secure solution to address your unique migration and infrastructure needs.

- 58 Regions, more than any other cloud provider
- 90+ Compliance offerings, the largest portfolio in the industry
- $1 Billion per year to protect customer data from cyberthreats

Advantages of IaaS

- Eliminates capital expense
- Reduction in monthly IT costs
- Improves business continuity and disaster recovery
- Innovate faster
- Responsive and agile
- Focus on your core business
- Increase stability, reliability, and supportability
- Improved security
- Meets compliance standards
- Modernize your technology

Cloud Migration

Microsoft Azure is increasingly becoming the go-to platform for businesses who are looking to transition to a cloud-first solution approach. Ancero helps customers make the move on their terms with a focus on efficiency. Cloud migration is a very customized process. It's a different journey for every organization. We craft cloud solutions that are distinct to each business to meet their individual goals and budget.
